INTRODUCTION

This publication lists the 90 surveys conducted by Provincial Government departments and agencies during the 1982-83 fiscal year. The surveys are listed by department and then alphabetically within departments. Surveys included under the Survey Review Program (i.e. new surveys with 50 or more respondents) as well as on-going surveys and surveys having less than 50 respondents are included.

The term "survey" is meant to cover questionnaire-type studies conducted by mail, telephone, personal interview or any other means by which information is gathered through contact with the respondents and where the information collected is to be presented as aggregate totals or statistics. Surveys do not include administrative forms where the primary unit of interest is the individual.

The co-operation of all departments and agencies, and especially that of the Data Users Planning Committee representatives is greatly appreciated.
